

Record DFA 127 Full Power

- The Record DFA 127 automatic swing door system automates doors quickly & economically to provide, accessible pedestrian openings in a wide range of environments.
- Dependable and versatile, the Record DFA 127 automatic swing door system is a universally applicable automatic swing door operator with many applications, thanks to its advanced programmable microprocessor and compact design.
- In addition, it is almost silent in operation making it suitable for quieter environments such as hospital wards, classrooms, corridors, office buildings and care homes.
- This overhead swing door operator is particularly suitable for hospital doors, helping limit the spread of germs being passed via hands as there is no point of contact when operating the door.

BENEFITS

- Automated door runs smoothly and economically
- Practically silent in operation
- Reliable and versatile with increased door safety
- Wide range of options available to suit all needs
- Aesthetically pleasing with minimal design
- Easy access for wheelchair users
- Opening sensors can be fitted in various locations

FEATURES

- Refined technology
- Compact design
- Programmable microprocessor
- Easy to use control switch BDE-E
- Available with low energy operation
- Motion-sensor activated

Drive Dimensions:

Length 600mm | Height 85 / 108mm | Depth 124 / 126mm

General Technical Specifications

230VAC, 50/60Hz | Rated Power 67W | Standby Mode 13W

Operating Conditions

-15C to +50C | Humidity up to 85% | IP20

Maximum Door Leaf Weight: 250Kg

Maximum Door Leaf Width: 1400mm

Drive Mechanism: Electro Mechanical

Closing Force: Adjustable EN 4 - 6

Drive Arms:

V-arm (push) or guide rail arm (push/pull)

Mounting Configuration

Transom mount push

Transom mount pull

Door mount pull

Standard Modes: Automatic | Door Open | Off (Manual)

Additional Program Switch Modes: One way traffic / Locked

Fire Rating: UK Fire Rated to EN1634-1
